50. The Singleton 'Druid' Helical Dials – *Barrie Singleton*
52. Portable Dials at the Galerie Delalande – *Dominique and Eric Delalande*

EDITORIAL

December again so it's time to vote for your 'Most Enjoyed Article' once more, this time for articles in the four 2013 issues. Please do send me your choices (up to three, in order) by any means you like—email, telephone, letter or carrier-pigeon. Last year the competition was won by a single vote so every vote is important. Authors put a lot of effort into writing their articles so do show them due recognition by voting.

A bumper Christmas issue for you this time. In mid-September I was rather short of material but in the end, lots of good articles arrived. Please keep them coming!

ERRATUM

In the article 'Planetary Hours' (*BSS Bulletin*, 25(iii) September 2013), by Lowne and Davis, the definition of equal hours on page 40, towards the bottom of the right hand column, is wrong. Instead of saying that it is "the time for the vertical through the sun to pass through 15° of the equatorial circle", it should have said that it was 'the time for the hour circle passing through the sun and the poles to move 15° round the equatorial circle'.

The authors thank Frank King for bringing this to their attention.
